Gary:

Please see the email below from Veolia. The \$ 400 charge is comparable to what we are paying at TIBM \$ 325 for the wash out (haz mat) and additional cost for the soap and deodorizer. We would like your approval so we can go forward with Veolia to get our boxes cleaned, washed and returned to Dynamic Rental.

David,

Good morning, can you please clarify have the boxes been cleaned and will go over to the commercial facility for deodorizing only or will the offsite facility complete both the washout and the deodorizing?

Thanks,

Beth,

When processed, all of the boxes have had heels which required manual digging to remove the solids. Due to the nature of the waste, we have had to do this work in Level B PPE (supplied air.) I think we have been able to dig out 6 or 7 of the boxes and expect to be able to dig out

the remaining boxes over the next couple of days.

For each of the boxes we have dug out up to this point, the residual odor is very strong. Our original proposal was to perform the washing at PTA as we did not expect to residual odor to be as bad as it is. We will now need to send the boxes to a commercial washout facility so they can be deodorized, which is not an option that we have at Veolia - Port Arthur. Since this will add additional costs to the processing, I want to see if we can recoup some of this cost. Our original proposal included \$775.00 per box to clean the boxes. We did this expecting that we would need to dig out the material, but not expecting that we would also have to deodorize the boxes. We would like to implement a change order for an additional \$400.00 per box to cover this additional expense. Are you accepting of this charge?

Also, Carson and I are in training for the remainder of today and part of tomorrow. Carrie sent a message to Carson that you may have additional material. Please respond to this email with a description of that material and the quantity.

FYI we are in the preparation stages for a maintenance turnaround. We have restricted our receipts in advance of the turnaround and will not resume normal operations until the week of February 9. As of now, our schedule is full for the first couple of weeks after we resume operations. This has us receiving shipments in the latter part of February. We do have access to a few 10 day transportation yards, so we may be able to assign delivery dates in late February, but move the boxes of CES property earlier than that. There are transportation costs associated with moving the boxes, so we will need to provide this information to you.

Please provide the information regarding the additional material so we can determine what our options will be to manage the material. Also, if you can please confirm agreement with the additional \$400.00 per box for cleaning or let me know if you need additional information to support this charge.

Thanks.
